The 29th International ACM Symposium on High-Performance Parallel and Distributed Computing
Stockholm, Sweden, June 23-26, 2020

GENERAL CHAIRS
Manish Parashar, Rutgers
Vladimir Vlassov, KTH Stockholm

PROGRAM CO-CHAIRS
David Irwin, UMass Amherst
Kathryn Mohror, LLNL

STEERING COMMITTEE
Ali Butt Virginia Tech
Franck Cappello ANL and INRIA
Abhishek Chandra Minnesota
Peter Dinda Northwestern
Salim Hariri Arizona
Dean Hildebrand Google
Jack Lange Pittsburgh
Arthur Maccabe ORNL
Manish Parashar Rutgers
Lavanya Ramakrishnan LBNL
Evgenia Smirni William and Mary
Kenjiro Taura U of Tokyo
Michela Taufer Delaware
Douglas Thain Notre Dame
Jon Weissman Minnesota

DEADLINES
- Abstracts due: January 16, 2020
- Papers due: January 23, 2020
- Author notification: March 27, 2020
- Conference dates: June 23 - 26, 2020

MORE INFO

OVERVIEW
The ACM International Symposium on High-Performance Parallel and Distributed Computing (HPDC) is the premier annual conference for presenting the latest research on the design, implementation, evaluation, and the use of parallel and distributed systems for high-end computing. The 29th HPDC will take place in Stockholm, Sweden in June 2020.

SCOPE AND TOPICS
Submissions are welcomed on high-performance parallel and distributed computing (HPDC) topics including but not limited to: clouds, clusters, grids, big data, massively multicore, and extreme-scale computing systems. Experience reports of operational deployments that provide significantly novel insights for future research on HPDC applications and systems will also receive special consideration.

In the context of high-performance parallel and distributed computing, the topics of interest include, but are not limited to:
- Operating systems, networks, and architectures
- High performance runtime environments
- Massively multicore systems, including heterogeneous systems
- Datacenter technology, resource virtualization
- Programming languages, APIs, and system inter-operation approaches
- File and storage systems, I/O, and data management
- Big data stacks and big data ecosystems
- Resource management and scheduling, including cost/energy-aware techniques
- Performance modeling, analysis, and engineering
- Fault tolerance, reliability, and availability
- Operational guarantees, risk assessment and management
- Emerging application areas that include cloud/edge computing and IoT

SUBMISSION GUIDELINES
Authors are invited to submit technical papers of at most 12 pages in PDF format, including figures and references. Papers should be formatted in the ACM Proceedings Style and submitted via the conference web site. Submitted papers must be original work that has not appeared in and is not under consideration for another conference or a journal. Reviewing will be double-blind—please refer to the website for more details.
