

ACM HPDC 2023

Call for Workshops

The 32nd International Symposium on High-Performance Parallel and Distributed Computing Orlando, Florida, United States

General Chairs:

Ali R. Butt, Virginia Tech, USA

Workshop Co-Chairs:

Yue Cheng, University of Virginia, USA
Youngjae Kim, Sogang University, Seoul,
South Korea

Steering Committee:

Jon Weissman, University of Minnesota
Devesh Tiwari, Northeastern University
Ali R. Butt, Virginia Tech
Abhishek Chandra, University of Minnesota
Peter Dinda, Northwestern University
Salim Hariri, University of Arizona
Dean Hildebrand, Google
David Irwin, UMass Amherst
Jack Lange, University of Pittsburgh and
ORNL
Arthur "Barney" Maccabe, University of
Arizona
Kathryn Mohror, LLNL
Manish Parashar, University of Utah
Lavanya Ramakrishnan, LBNL
Evgenia Smirni, College of William and Mary
Michela Taufer, University of Tennessee
Douglas Thain, University of Notre Dame

Deadlines (AoE):

Deadline for Proposal: **January 15, 2023**

Notification of Acceptance: **January 31,
2023**

Submission Deadlines: **Late March 2023***

Camera-Ready Deadline: Preferably Early
May 2023**

Workshop Dates: **TBD**

*could change slightly, to allow for the flow
of borderline articles from main conference
to workshops

**could change slightly, to synchronize with
the main conference proceedings

Overview:

The organizers of the 32nd International ACM Symposium on High-Performance Parallel and Distributed Computing (HPDC'23) call for proposals for Workshops to be held with the main conference.

The HPDC Workshops provide forums for discussion among researchers and practitioners on focused topics and/or emerging research areas relevant to HPC and distributed computing.

Workshops typically include some combination of invited talks, peer-reviewed papers, panel discussions, and work-in-progress talks. Proposers should design workshops for approximately 20-40 participants, lasting either one full day or one-half day, depending on interest and space constraints. Proposals for workshops on new topics are welcome, as are proposals to continue previously successful workshops. Tutorials that would provide attendees with an interactive learning experience will be given special consideration in acceptance. HPDC workshop proceedings will be published by ACM in the HPDC proceedings companion book.

Formatting Guidelines:

Workshop proposals should be formatted as a single PDF document of 2-4 pages, describing the following:

- The full name and acronym of the workshop
- Whether the workshop is planned for one full day or one-half day
- A description of the theme of the workshop and its key topics
- A description of the relevance to HPDC
- The structure of the workshop (peer-reviewed articles, invited articles, invited talks, panels, etc.)
- Proposed names for invited speakers and panelists and their impacts on the topics discussed at the workshop
- A tentative list of program committee members (optional)
- Details of the review process leading to acceptance to present at the workshop
- If the workshop will have a call for papers, a tentative version of such CFP (optional)
- If the workshop is going to have published papers, the type of papers to be accepted and their length
- A summary of the intended audience
- A plan for attracting submissions and attendees to the workshop
- A brief biographical information on the workshop organizers Data about previous editions of the workshop (if any) including attendance, number of papers submitted and accepted

Accepted workshops will need to be ready to set up a website and, if a paper submission process with peer review is going to be used, provide the submission link.

Proposal Submission:

To Submit: Please email your proposal to Youngjae Kim (youkim@sogang.ac.kr) and Yue Cheng (mrz7dp@virginia.edu) and with the title "HPDC'23 Workshop Proposal"
